

Please note that we will be using different draws/orders of play this year in the AC Open Doubles and Singles:

- Rather than the usual seeded draw, we will be using the 'Worlds' style draw which gives a nice spread of opponents across each day (for singles) (rather than the top seeds getting easy games and building up and the lower seeds getting all tough games early on).
- The main benefit of this format is for the players around the cusp of qualifying (in this case players 3-6 of the singles and 1-4 of the doubles) will be playing each other in the final/important rounds
- As the **singles** have blocks of 9 (which is basically 10 with a bye), we will simply use the World's order of play for the singles (see below).
- As the **doubles** only have 8 players per block, it will actually look a bit like a normal seeded draw so that the top 4 are playing each other on the final 3 rounds with a slight change in order of play
